公司简介

昆山盛唐通风设备有限公司

注册资金
10000万

员工数量
100+

为全球客户提供服务
500+

占地面积
43000平方米

昆山盛唐通风设备有限公司是一家集研发、制造和销售为一体的通风设备生产企业，坐落在江苏省昆山市高新技术开发区，公司拥有自建厂房，面积达43000m²。产品主要应用于工业通风，消防排烟，环保除尘，工业废气，楼宇通风、风阀、新风净化器等行业。

我们的原则是：品质至尊，诚信为本。

我们注重人才培养，拥有强大的研发力量和技术团队，专注于产品的研发及创新，注重制造工艺的改进与创新，不断投入更新先进设备，确保我们的产品质量始终如一，更加完美、可靠。

Kunshan Shengtang Ventilation Equipment Co., Ltd. is a ventilation equipment manufacturer integrating R&D, manufacturing and sales. It is located in Kunshan High-tech Development Zone, Jiangsu Province. The company has self-built workshops with an area of 50,000m². Products are mainly used in industries such as industrial ventilation, fire-fighting smoke exhaust, environmental protection and dust removal, industrial waste gas, building ventilation, air valves, fresh air purifiers and other industries.

Our principle is: Supreme quality, honesty.

We focus on talent training, have a strong R&D force and a professional technical team, focus on product development and innovation, focus on the improvement and innovation of manufacturing processes, and constantly invest in updating advanced equipment to ensure that our product quality is consistent, more perfect and reliable .

公司成立以来，坚持“品质至尊”、“诚信为本”的经营原则，公司拥有雄厚的技术力量，专业的研发能力，先进的自动化生产，加上成熟的制造工艺和丰富的制造经验，高起点、高投入、高品质是我们的发展战略，使我们产品广泛应用于冶金、化工、电力、制药、食品、涂装环保、工业除尘、通风等行业及其领域。

团队 TEAM
就是力量

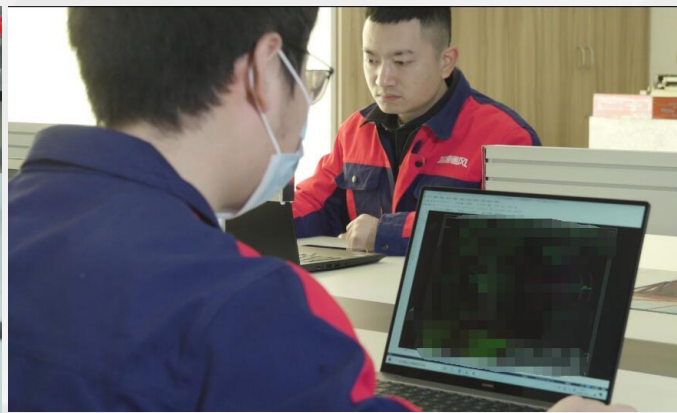

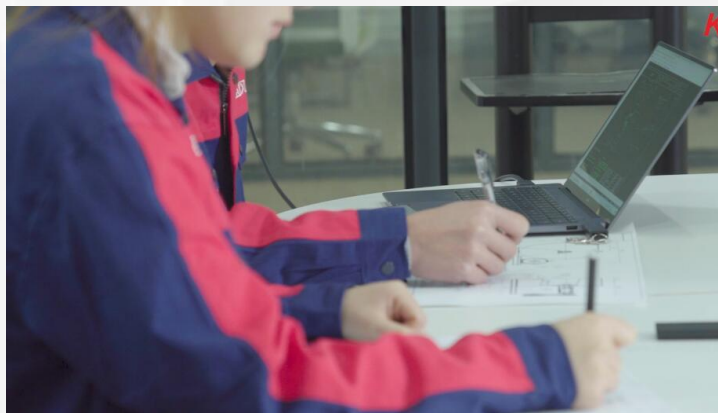

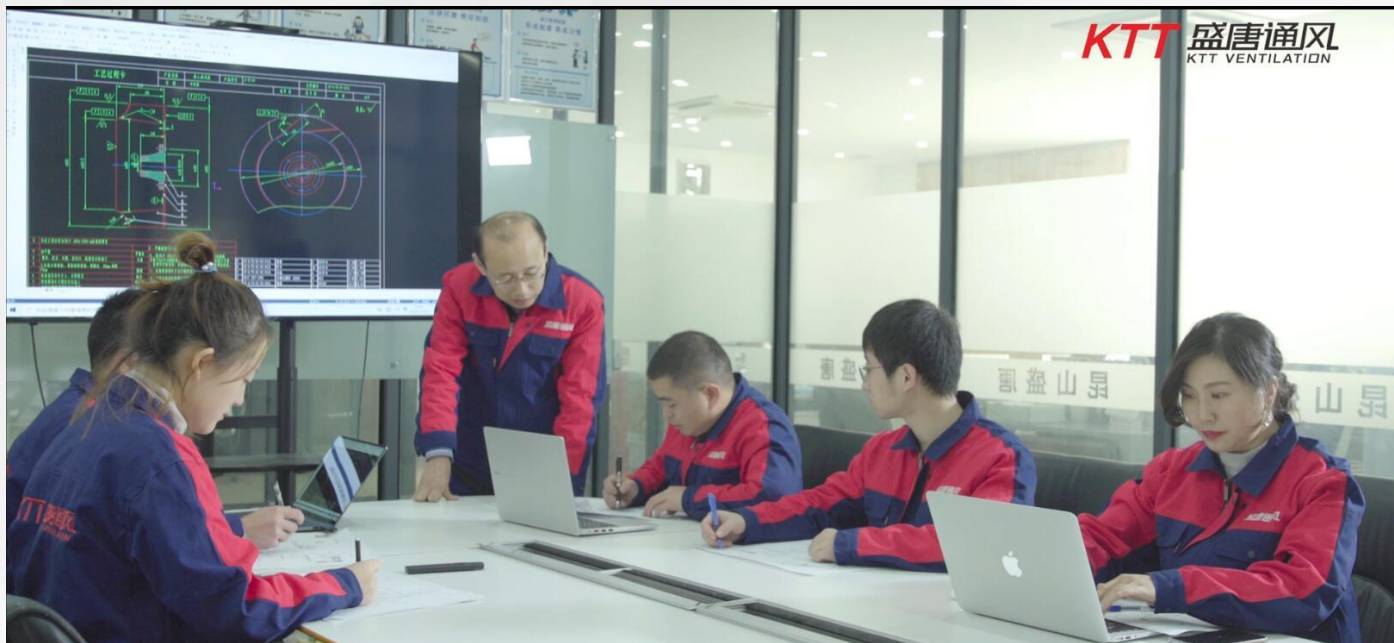

Since its establishment, the company has adhered to the business principles of "quality supreme" and "integrity-based". The company has strong technical force, professional research and development capabilities, advanced automated production, plus mature manufacturing technology and rich manufacturing experience, and a high starting point, High investment, high quality is our development strategy, so that our products are widely used in metallurgy, chemical industry, electric power, pharmacy, food, coating environmental protection, industrial dust removal, ventilation and other industries and fields.

组织架构

TECHNOLOGY

历经数年发展，盛唐积累了雄厚的技术力量和研发能力，一大批行业经验丰富的研发人员，为您量身打造最优的解决方案。通过CFD模拟分析，以及CAD等辅助设计，结合多年积累的行业经验，根据项目特点，可以提供最佳的产品设计组合，让项目达到最佳的使用效果。

After several years of development, Shengtang has accumulated strong technical force and R&D capabilities, and a large number of industry experienced R&D personnel can tailor the best solutions for you. Through CFD simulation analysis, CAD and other auxiliary design, combined with years of accumulated industry experience, according to the characteristics of the project, it can provide the best product design combination, so that the project can achieve the best use effect.

EXPERIMENT

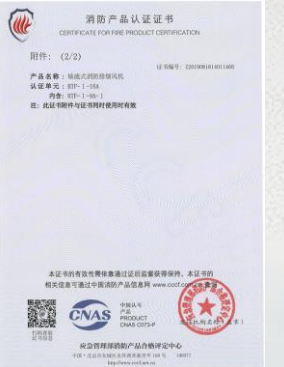

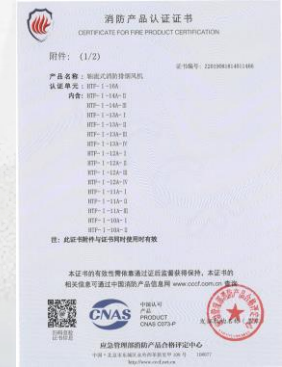

为了更好的产品和服务，盛唐投资数千万元，建立超大规模的风室，将成为领先的大型综合测试检验平台，为设计制造更优的产品提供技术保障。

In order to provide better products and services, Shengtang invested tens of millions of yuan to build an ultra-large-scale wind chamber, which will become a leading large-scale comprehensive test and inspection platform and provide technical support for the design and manufacture of better products.

全自动喷涂线

数控机加工车间

数控机冲压车间

生产制造全面采用先进的数控设备，公司拥有激光切割机、数控折弯机、自动化数控焊接机、全自动喷涂线、数控机加工车间、数控机冲压车间等生产所需的先进设备。同时严格按照国际质量体系生产制造相关零部件，确保每一台盛唐的风机质量可靠，安全合格的交付给每一位用户。

Production and manufacturing adopt advanced numerical control equipment. The company has advanced equipment required for production such as laser cutting machine, numerical control bending machine, automatic numerical control welding machine, automatic spraying line, numerical control machining workshop, and numerical control machine stamping workshop. At the same time, relevant parts are manufactured in strict accordance with the international quality system to ensure that each Shengtang fan is of reliable quality and safe and qualified to be delivered to every user.

远程系统

盛唐紧跟时代发展，提升用户体验，盛唐研发的风机物联网管理平台，实现了在线监测，可使用户对设备的运行状态做到充分了解，故障提前发现，从而提高使用效率，避免、减缓和减少重大生产事故的发生，以及降低维修费用。

Shengtang keeps up with the development of the times and improves user experience. The wind turbine IoT management platform developed by Shengtang realizes online monitoring, which enables users to fully understand the operating status of the equipment and detect faults in advance, thereby improving use efficiency and avoiding, Slow down and reduce the occurrence of major production accidents, and reduce maintenance costs.
